## List of Web Pages and Their Intent

- Home Page (index.html): Introduces Jordan Glaves, showcasing his interests, education, and personal background.

- Professional Page (professional.html): Highlights Jordan's professional aspirations, skills, and mission in the field of software development.
- Personality Page (personality.html): Discusses Jordan's personality traits based on a personality test and features his hero, Sung Jin-Woo.
- Personal Development Page (development.html): Reflects on the "Twelve Pillars" and provides details about Jordan's degree and skills.
- Storyboard Page (storyboard.html): Serves as an overview of the website's structure and purpose.
- References Page (reference.html): Lists all the sources and references used in creating the website.

## **Theme of the Site**

- Theme Description: The website has a modern and clean aesthetic, utilizing a color scheme that includes shades of blue and light pastels. The graphics should resonate with the themes of technology and personal growth, appealing to an audience of potential employers, peers, and anyone interested in software development. The layout will be user-friendly, ensuring easy navigation and readability.

## **List of Features to be Used on the Website**

- Image: For visual appeal on all pages.
- Links: To external resources and references.
- Interactive Navigation: Hover effects and clear button styles for a better user experience.
